

ART PROGRAM has been founded in 2004 and is a dynamically growing IT service provider. Our core business are customized IT solutions, which covers a large area, from consulting to software development and outsourcing.

Our team, which implies more than 15 highly qualified specialist permanently up-to-date with the newest technologies, assures our clients the best IT services. Due to its' deep knowledge in many domains of the IT industry, our team is the perfect partner if you are looking for proficiency combined with creativity and dynamism at Central European prices.

Our aim is to become partners of our customers even after working together, by assuring them appropriate software development, consulting, debugging or complete IT solutions. We develop customized, innovative solutions, using the latest programming languages and technologies (Java, .NET, Oracle, Siebel, etc.).

Our activity is mostly orientated to industrial applications, especially telecommunications, but we have significant experience in databases and CRM solutions as well. We also execute the complete testing of applications developed by a third party, as well as the elaboration of technical documentations and user manuals.

The carefully planned and optimized use of our project resources and our reusable software components enable us to offer high quality and short deadlines at very attractive prices.
